Next Generation Data Centers and Energy Management Systems

Lecture 10A: Modeling and Simulation of an Energy Management System

Prof. Thomas M. Schutzius

Department of Mechanical Engineering

Fall 2026

Berkeley
UNIVERSITY OF CALIFORNIA

Learning Plan

- Introduction to Data Center Systems and Thermodynamics
- Psychrometrics and Heat Transfer
- Performance Metrics and Standards
- Applied Computational Fluid Dynamics (CFD)
- Liquid Cooling & Advanced Heat Transfer
- Chip Cooling: Heat Conduction and Thermal Interface Materials
- Power Delivery and Infrastructure (Energy sources: Geothermal, Solar, Nuclear, etc.)
- Overview of Simulation Field; the Concept of a Digital Twin
- Machine Learning and Optimization Tools
- **Modeling and Simulation of an Energy Management System**
- Control Systems and Optimization
- Spacecraft Thermal Control
- Final Project Work, Peer Feedback, and Mentor Check-in
- Symposium

Learning Objectives

- ISO 50001 Energy Management Standard
- Implement a Convolution Neural Network (CNN)-Long Short Term Memory (LSTM) Architecture for load forecasting in a building energy management system

Typical layout of a data center facility

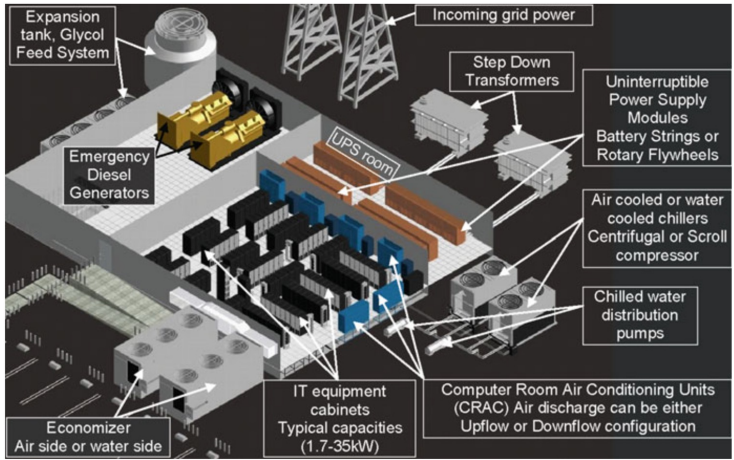

Figure 1: (Figure 1.1 in Ref. [1]).

Seminar 9

- Bryson Borzini
- Title: Building Next-Generation Data Centers: A Mechanical Contractor’s Perspective
- Date: November 17, 2026
- Time: 15:30 (Berkeley Time)
- Location: GSPP 150

ISO 50001 Energy Management Standard

- The International Organization for Standardization (ISO) has a standard, ISO 50001, which provides a framework for industrial facilities seeking to manage their energy use. Certification under this standard communicates how a company is tracking and reducing its energy use.
- Some Google-owned and operated data centers have this certification. Equinix claims to do this too.

CNN Deep Learning Model for Time Series Forecasting Problems

- Neural networks that were designed to efficiently handle image data.
- They can automatically extract features from raw input data and can be applied to time series forecasting problems
- How to prepare time series data for CNNs and LSTMs?
